ENTERPRISE REPORTING & ANALYTICS – FEDERAL AGENCY
Transforming Business Information into Meaningful Results for Full Suite of Reporting Solutions

The Agency
One of the largest Federal Agency with more than 10 operating divisions with a wide variety of public services and critical research for the nation, protecting and serving all Americans.

Business Challenge
Three years ago, the Agency was struggling with the growing amount of Personnel Data and the continuous requirements from various operating divisions for meaningful reporting of the data. The reporting requirements were both internal for day to day operations and also external required by Congressional mandates.

To maintain a high level of performance, the Agency needed to upgrade its enterprise reporting and data analytics solution. Management saw this as an opportunity to also strengthen data integrity, improve collaboration and introduce reporting dash boards.

The Solution

Working with SAP Business Objects and our prime contracting partner, ABSCUS built out an effective enterprise reporting and analytic platform that empowers the Agency to make evidence-based decisions that align with business strategy. The solution was a successful business intelligence and information system that leverages Agency wide data to support its customers in making better decisions.

The solution featured:
- Comprehensive access to data sources including payroll, time and attendance, personnel and recruiting information
- Ability to build ad-hoc reports that meet different operating divisions needs including Congressional reporting requirements
- Light weight web based data entry modules to capture customer specific transaction data
- Maintenance, expansion and integration of databases
- Flexible organization of data transactions to facilitate mining and analysis
- Training and education on data interpretation and report creation

Customer Achievement
- Timely delivery of Data requests
- Increased customer satisfaction with our service
- Seamless business analytics from Big Data including self-service
